

MEASUREMENT

Stage 5-6

1. How many bananas would you need to make smoothies for a rugby team?
2. How many teaspoons of honey?
3. About how many millilitres are there in a cup of milk?
4. How many litres of milk would you need to make a smoothie for everyone in your rugby team (15)?
5. Get a bunch of bananas and weigh them individually.
 - ↪ What are their weights?
 - ↪ Which one was the heaviest?
 - ↪ Which one was the lightest?
 - ↪ What is the average weight of the bananas?
6. What would be the total weight of bananas needed for a rugby team smoothie?
7. How much smoothie does your glass hold (ml)?
8. How much of the smoothie is not milk?
