

MEASUREMENT & NUMBER STRATEGIES

Stage 5-6

1. You are going to a rugby game at the stadium with your four friends. It costs \$6 to get into the game and you would obviously need to get some food for the match. How much money will you need altogether and what are you going to buy? List these.

2. What can your friends buy if they have the following amounts of money?

Friend 1 = \$11

Friend 2 = \$10

Friend 3 = \$14

Friend 4 = \$7

3. How much change would they all get from their purchases?

4. If you buy everything off the menu, how much would it all cost?

5. How much would it cost if you and your friends all bought everything off the menu?
