

NUMBER STRATEGIES

Stage 7

1. Rugger has 50 rugby photos. He wants to put four on a page. How many pages will he need to use in his photo album?
2. Webb has a bag of lollies and there are 119 in a bag. How many are in four bags?
3. William found that there are five rugby cards in a Ruggerbee card pack.
 - (a) How many complete packs can be made from 154 cards?
 - (b) How many cards are left over?
 - (c) Webb wants 174 cards. How many packs must he buy?
4. There are 96 Ruggers at the rugby training camp.
 - (a) They are put in groups of three for a game. How many groups are there?
 - (b) Later they are put in groups of eight for a run. How many groups are there?
 - (c) They are put in groups of 15 for a rugby game. How many groups are there?
 - (d) How many are left over?
5. The bus travels 13km on each litre of petrol. They have to travel 546km to get to the camp.
 - (a) How many litres of petrol will they need?
