

1. Two hundred and twenty seven rugby players went to a trial match. Every tenth player was chosen to play. How many were chosen?
2. Rugger's backyard is 10m by 14m in size. Each day Rugger runs down the 3m path to the back of his section and around the very edge of his backyard 12 times. Then he runs back up the path. How far does Rugger run each day?
3. Rugger and Alice both go to the gym each week. Alice goes every three days but Rugger goes every fourth day. If they both go on Monday when will they next be at the gym together?
4. Each time a rugby ball bounces, it bounces to half the height from which it falls. If Rugger drops the ball from a grandstand and it rises to a height of 24m, how high will it bounce on the fifth bounce?
