

- William is running to get fit. Each day he runs less because he gets more tired. On the first day he runs 3.8km, on the second day 3.5km, on the third day 3.2km and on the fourth day 2.9km. How many days will it take him to run 20.3 km?
- Four Ruggerbees measured their heights. Beanie was taller than Sheree, but not as tall as Jojo. Stewy was taller than Jojo. Write down their names in order of heights, from shortest to tallest.
- Rugger has a one-litre bottle of water. He pours half of the water out into a glass, and then gives the bottle to Webb. Webb pours half of what's left in the bottle into two cups. Then he hands the bottle to William. William pours half of what's left into a paper cup. How much is left in the bottle?
- Before a game of rugby every player shakes hands with every one of their 15 team mates. How many handshakes are there?
