

Practical

Go outside and have ten shots at goal - four in front of the posts, three to the left and three to the right. Keep a record of how many you were successful with in each area.

1. How many did you get in front?
2. How many did you get from the left-hand side?
3. How many did you get from the right-hand side?
4. What percentages of your shots were successful?
5. What was your percentage from shots in front of the posts?
6. What was your percentage from shots not taken from in front of the goal?
7. Compare our results to others in the class. Who had the highest successful percentage?
