

### KEEPING THE STATS

Using the charts on the results and stat pages, (Results Page and Player Statistics) answer these questions once the tour has finished.

1. Calculate the individual number of points scored by members of the Lions team. Remember that a try is worth five points, a conversion two points, and penalties and drop goals are worth three points each.
2. Arrange in order the top five point scorers for the Lions.
3. How many points did the Lions score altogether during the tour?
4. How many points did they have scored against them?
5. What was the difference between the points for and against in the tour?
6. What was the most common number of tries scored by the Lions in each game?
7. What was the most common number of tries scored against the Lions in each game?
8. How many more points were scored by tries than conversions?
9. Did conversions earn the Lions more points than penalties?
10. What was the ratio of points for and against the Lions during the tour?
11. How many tries did the Lions score on average per half game?
12. What percentage of tries scored were converted?
13. There are 80 minutes playing time per game. How many points per minute did the Lions score?
14. What were the two Lions games played closest together? How many days between these games?
15. How many days elapsed between the Lions' first and last game?
16. What fraction of points was scored by: (i) backs? (ii) forwards?
17. What percentage of the points was scored by the Lions in their Test match games?
18. What percentage of the points was scored by the wingers?
19. Construct a pie chart of the points scored by tries, penalties, conversions and drop goals, for the entire tour.
20. Construct a double bar graph showing the results of the season. Use a different colour coding to highlight the Test matches.
